

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN FRANCISCO BAY REGION

ORDER NO. 90 - 050

NPDES PERMIT NO. CA 0027774

RESCINDING WASTE DISCHARGE REQUIREMENTS FOR:

MARINE WORLD-AFRICA USA AND CAMPEAU CORPORATION CALIFORNIA,
REDWOOD CITY, SAN MATEO COUNTY

The California Regional Water Quality Control Board, San Francisco Bay Region (hereinafter called the Board), finds that:

1. Marine World-Africa USA formerly operated an amusement park facility at a site in Redwood City, San Mateo County. The Campeau Corporation California was the owner of the facility site property.
2. On May 15, 1985 the Board adopted Order No. 85-54 (NPDES Permit No. CA 0027774) prescribing Waste Discharge Requirements for Marine World-Africa USA and Campeau Corporation California (hereinafter collectively called the Dischargers), for discharges of wastewater from a lagoon system at the facility site into Belmont Slough, a water of the State and of the United States.
3. Marine World-Africa USA subsequently relocated their entire facility to a site adjacent to Lake Chabot in the City of Vallejo, Solano County, California. This relocation was completed by spring of 1986.
4. The new Marine World-Africa USA facility in Vallejo has different characteristics than the Redwood City facility, and the new facility does not have discharges as described in the existing permit, Order No. 85-54.
5. Stormwater runoff from the Vallejo facility site discharges into Lake Chabot, and these discharges are presently being regulated separately. Marine World-Africa USA has been conducting a Self-Monitoring Program since late 1986 for the stormwater discharges from its facility and for the receiving waters of Lake Chabot. Marine World-Africa USA is presently developing a Lake Management Plan for Lake Chabot, in cooperation with the City of Vallejo
6. The lagoons at the Redwood City site have been renovated into a single lagoon which is now used by the present facility, Centrum Office Park, for stormwater control. The Campeau Corporation transferred ownership of the property to Centrum Associates in April 1988. The discharges from the present lagoon, now known as Centrum Office Park Lagoon, to Belmont Slough are regulated under a separate NPDES Permit.

7. The Dischargers have discontinued use of the facility described in Order No. 85-54, and are no longer responsible for the discharges described in that Order. Therefore, the Waste Discharge Requirements prescribed in Order No. 85-54, which serves as an NPDES Permit, are no longer applicable.
8. This Order will rescind the Waste Discharge Requirements and NPDES Permit prescribed by Order No. 85-54. Adoption of this Order is exempt from provisions of Chapter 3 (commencing with Section 21100) of Division 13 of the Public Resources Code (California Environmental Quality Act), pursuant to Section 13389 of the California Water Code.
9. The Discharger and interested agencies and persons have been notified of the Board's intent to rescind waste discharge requirements and have been provided an opportunity for a public hearing and the opportunity to submit their written views and recommendations.
10. The Board, in a public meeting, heard and considered all comments pertaining to the discharge.

IT IS HEREBY ORDERED, pursuant to the provisions of Division 7 of the California Water Code and regulations adopted thereunder, and to the provisions of the Clean Water Act and regulations and guidelines adopted thereunder, that:

This Board's Order No. 85-54 (NPDES Permit No. CA 0027774) is rescinded.

I, Steven R. Ritchie, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, San Francisco Bay Region on April 18, 1990.

STEVEN R. RITCHIE
Executive Officer
